

Charming Skirts For Summer

In Many Smart Fabrics

A collection of Skirts that cannot be resisted for their good style and their adaptable serviceability.

The early Summer Days call especially for skirts like these, made of both plain and strikingly designed fabrics that add a becoming note of color to one's outfit. These models break away from severe straight lines and assume peg top effects given them by their fancy pockets and side folds. Women who will spend much time outdoors this Summer will buy several of these Skirts for various purposes, for our prices are so reasonable.

FAIR STOCK MUST SELL

FAIR ASSOCIATION MUST SELL STOCK TO REPAIR PROPERTY.

If Pontotoc county is to have an annual fair in 1918 the citizens must come forward and help. The flood of some weeks ago did considerable damage to the grounds and property and this must be repaired and some of the buildings overhauled.

To accomplish these things will cost some money and the association purposes to raise the necessary funds by selling the remaining stock. There is \$2925 dollars of unsold stock, less about \$1000 which Col. J. W. Davis has recently placed. He will make a canvass of the county within the next few days and endeavor to sell the balance.

Every citizen interested in the livestock and agricultural business will have an opportunity to get in on this matter.

WILSON RENEWS APPEAL TO LABORING CLASSES

(By the Associated Press)
Washington, June 11.—President Wilson today telegraphed to the American Federation of Labor and American Alliance for Labor and Democracy, in convention at St. Paul, Minnesota, urging renewed efforts of labor in support of the war program. "The war can be lost in America, as well as on the battle fields of France, and considered or unjustified interruptions of essential labor may make it impossible to win it," said the President's telegram.

Perfect Artificial Eyes.
Artificial eyes are much more commonly worn than most people imagine. The average user does not make advertisement of the fact, which may be known only to a few intimate friends, for such eyes nowadays, a product of the glassblower's highest skill, are of a workmanship so artistic as to be perfectly deceptive. When, as is usually the case, the eye is set upon the "root" of the natural organ it moves exactly like a real one.

Reasonable Theory.
"Why, John," exclaimed Mrs. Newkirk as she came into the room, "what in the world makes the baby cry so?" "I don't know, my dear," answered Newkirk, as he handed the infant over to his mother, "but I imagine he is thinking of what the governor of North Carolina once said to the governor of South Carolina."

Optimistic Thought.
In case of difficulty and when hopes are small, the most resolute counsels are the safest.

GERMAN OFFENSIVE MAKES ONLY SLIGHT PROGRESS

FRENCH OFFER STOUT DEFENSE

GERMANS PUSHING DRIVE BUT FRENCH LINE HOLDS AND REGAINS GROUND.

(By the Associated Press)
Paris, June 11.—The German drive between Montdidier and Noyon continued unrelentingly last night, says today's war office statement. On their left the French offered effective resistance, recapturing the village of Mery. The principal German effort was directed against the center where with heavy forces the enemy drove back the French as far as the Aronde river region. In a brilliant counter attack the French hurled the enemy back all along this front and re-established their line south of Belloy at Statur. On their right the French engaged in violent combats with large concentrated enemy forces, withdrawing their line to the west and south of Ribecourt.

American Casualty List.
Washington, June 11.—Today's army casualty list contained 130 names, divided as follows: Killed in action, twenty-six; died of wounds, three; died of accident, and other causes, three; died of disease, seven; wounded severely, forty-eight; wounded degree undetermined, forty-three. Private Cecil C. Craig, Phillips, Oklahoma, killed in action.

British Gain Local Advantages.
London, June 11.—The British last night carried out an operation in the Amlens region by which their line south of Morlaucourt was advanced half a mile on a mile and half front, the war office announces officially today. Two hundred and thirty-three prisoners were taken.

CREEKMORE WANTS OUT OF PENITENTIARY

Oklahoma City, June 11.—W. J. Creekmore, sentenced by Judge John H. Cottrell to serve three years in the federal penitentiary at Leavenworth, Kan., and to pay a fine of \$2,300 as a result of his conviction for alleged conspiracy in connection with the wholesale shipments into Oklahoma from Joplin and other points of liquor, has applied to the federal parole board for a parole, according to information which reached here yesterday.

Creekmore is said to be in a serious condition at the penitentiary. He finished serving one-third of his sentence May 25 which entitled him to appeal to the board for a parole. He has been confined to the hospital ward at the penitentiary ever since he was received.

Peculiar Presents for Bride.
In social circles of the Celestials the family of the bridegroom makes presents to the family of the bride of various articles a few days before the day fixed for the marriage. The presents generally consist of food, the leg and foot of a pig, the leg of a goat, eight small cakes of bread, eight torches, three pairs of large red candles, a quantity of vermicelli and several bunches of firecrackers.

Making the Dandelion Beautiful.
The original chrysanthemum, from which all the superb varieties we know today are descended, was, in its wild state, no bigger or handsomer than a dandelion. It is found that the latter grows with astonishing rapidity and luxuriance of bloom under cheesecloth shade.

Let a Want Ad get it for you.

SOME GROUND GAINED AT HEAVY COST OF MAN POWER, ARE HELD AT MOST POINTS

(By the Associated Press)
Battling their way forward in the center of Montdidier-Noyon line the Germans are making slight gains at heavy costs. The Germans are making great progress along the Mathe valley but their advance has not yet greatly affected the wings of the attacking front. The apex of the new German salient extends from Mery to Elincourt, a distance of about seven miles. On the western wing continued heavy German attacks make no impression on French resistance. On the east the Germans made their greatest gain in Thiescourt wood region, advancing to Almet mile. Meanwhile American marines north-west of Chateau Thierry continue their attacks, having advanced Monday into Belleau wood, a distance of two-thirds of a mile on a 600 yard front. The northern edge of wood is now all remaining to the Germans, on the British front there has been only minor and normal artillery activity. On the American sector north-west of Toul the artillery fire has increased somewhat but no infantry activity is reported.

Chesterfield and Voltaire.

The fourth earl of Chesterfield was on one occasion at a grand assembly in France where Voltaire was one of the guests. Suddenly the French writer accosted his lordship with the words: "My lord, I know you are a judge. Which are the more beautiful the English or the French ladies?" "Upon my word," replied Chesterfield with his usual presence of mind. "I am no judge of paintings."—Argonaut

Complex Action Automatic.

Houdini, the sleight-of-hand performer, in one of his acts used to keep four balls moving in air, and this complex series of actions, which at the start depended upon a guiding perception, finally became a mere automatic mechanism to him. He frequently read from a book or newspaper while he was tossing the balls.

Penn's "Walking Purchase."

The "walking purchase" was a purchase of land by William Penn from the Indians in 1682, which was to extend as far to the interior from the Delaware river as a man could walk in three days. At the end of a day and a half of walking, it is said, Penn declared he had land enough. He had walked 40 miles.

Social.

Twenty-five members of the Presbyterian Ladies' Aid were pleasantly entertained at the manse, Mrs. George Beck being hostess.

After a short business meeting Henei Moser and Louise Barney each gave a delightful reading. Miss Geraldine Hale favored the guests with a vocal solo. The special feature was a short selection read by little Kathryn Grigaby.

Light refreshments were served after which the club adjourned to meet in September.

CANADIAN BRIDGE CONTRACT SIGNED

PONTOTOC AND SEMINOLE COUNTIES TO BE LINKED WITH LOW WATER BRIDGE.

This morning the County Commissioners signed a contract for a low water bridge across the Canadian river at Byng, six miles north of Ada, where the big power plant is located. The Kansas City Bridge Company was awarded the contract at \$23,541 and will begin work as soon as possible.

The bridge will be 1,160 feet in length and consists of fifty-eight 20-foot pannels. It will be constructed of concrete. With a bridge of this type, now becoming quite common, flood water runs over the bridge, instead of beneath it. Of course when the water is very high traffic will be stopped, but in the case of the Canadian this will seldom be for long. The bridge will be built with funds from the counties of Pontotoc and Seminole and from the state money.

It is the purpose of the commissioners of this county to build a good road 100 feet in width to the river. It is already opened to this width to the fair grounds. The new tractor and grader will soon be put to work and the road put in good shape to the width of fifty feet and later the other half taken care of.

Heretofore the Canadian has proved a formidable barrier to traffic on either side but with the bridge Pontotoc county will be in line for large volume of travel north and south.

The bridge near Francis will probably be built as soon as the bonds are disposed of.

County Commissioner, 3rd Dist.: **HENRY F. BIBB.**
W. H. BRENTS (Re-election).

GERMANY NOW THREATENS REPRISALS.

According to reports from Switzerland the Germans are wreaking vengeance on helpless prisoners in reprisal for air raids of the Allies on German cities, and a Washington dispatch a few days ago told of a threat to do the same with American prisoners unless von Rentelen, the German arch-conspirator, serving a

term in this country for his activity in plotting the destruction of munition plants and other dastardly crimes against this nation while it was still at peace with Germany, is released at once. The Huns think it is all right to rain death onto the helpless women and children of London and Paris, insisting that this is a matter of military necessity, but when it is brought home to them they raise a howl and announce a policy of "reprisals." The Allies are not likely to be brought to terms by any such methods. They hold more German prisoners than the Germans do Allies, and although visiting the consequence of the act of the brutal leaders of the German nation on the heads of the prisoners is revolting to the civilized minds, the Allies can certainly do no less than retaliate should they be forced to such a policy by the ruthlessness of the Huns. They cannot permit their own men to be starved and tortured without calling a halt to adopting similar measures. No other weapon remains to them. The German idea from the first has been to strike terror into the hearts of their enemies, and although every move to this end has met with signal failure and only deepened the determination of the Allies to win the war at all costs and cause them to fight with greater vigor, the Kaiser clings to this delusion and still hopes to frighten his opponents into a peace of his own dictation. As for von Rentelen it would be an easy matter to dispose of his case by taking him from his prison cell and either hanging or shooting him as he so richly deserves.

DON'T WORRY ABOUT HIM.

It has been said often, but it must be repeated over and over again, because of the misgivings that come to the hearts of the home folk as the boys leave for the front:
Don't worry about your lad's morals. Don't worry about his religion. Says the Rev. Lauchlin MacLean Watt, chaplain of the famous Gordon Highlanders:
"I never knew the real meaning of the words of Christ until I saw the wounds of my brave brothers slain for the sake of others. I never knew the real significance of duty till I saw them torn and broken, dying for duty's sake, rather than yield a foot in the front of battle. It may mean less for the church than the church is apt to think, but it will mean more for Christ and the best life of the world than meantime we can understand for our heartache or see for our tears."

We need not expect our boys to pay much attention to conventional church forms over there, he says. We need not expect to see them turning into "plaster saints." Some of the things they do and say under the stress of trench life might shock us. But—
"If you seek for staunch, true manhood, that loves home and the hearts there dear to it with an unwavering fidelity—that loves honor, and is content to live yonder in suffering and discomfort, and to die without a grudge for its sake, thank God, you will find it yonder, in crowds and masses. And the heart that is devoted to these things is surely not far from the kingdom of Heaven."—McAlester News-Capital.

Brief News Stories.

TEACHER CHOSEN GOVERNOR OF TAMPAULIPAS STATE.

Mexico City, June 10.—"A square deal for everybody is the promise made for the people and industries of Tamaulipas by Professor Andres Ozuna, recently elected provisional governor of that state by the national senate after a bitter fight for the post that involved two generals and caused the revolt of one of them. The naming of a school teacher to govern a state which, because of its oil deposits, is described as the keystone of Mexico's international relations, is in itself an innovation in modern Mexican politics.

"The people of Tamaulipas expect a square deal," said the new governor, "and they will get it. The foreign interests need no special favors. They want a square deal and I'll do my best to give it to them."

Governor Ozuna, in addition to being one of the few non-military men who have held responsible governing posts in Mexico in the last decade, enjoys the added distinction of being virtually independent in his state. The new constitution for the state has not yet been formulated, so it remains for the governor to designate what laws shall be enforced.

Governor Ozuna has spent eight years in the United States and was given his degree at Vanderbilt University in 1913. Since January 3, 1916, he had acted as director general of Public Education and during his incumbency he put into effect an era of efficiency by installing the merit system of teachers, inaugurating educational reforms, cutting down the office force of his department and eliminating politics in the teaching force. These reforms were put through and the number of schools in the republic increased greatly despite scanty appropriations.

Governor Ozuna was chosen by the national senate from among three candidates named by President Carranza. The other two were General Carlos Ozuna and General Rafael Cardenas. General Ozuna is a nephew of the new governor and will command the military forces of the state.

MILITARY SITUATION OF ITALY IMPROVED

(By the Associated Press)

Headquarters Italian Army, June 11.—General Crozier of the American ordnance department and member of the Advisory War Board has spent a week of observation along the Italian front and at the various large centers where artillery and munitions are produced.

Besides seeing General Diaz and the Duke of Aosta he visited a number of the corps and division commanders along the mountain and Piave fronts, going into the trenches and among the men, discussing the many questions of equipment and supplies and specially observing the resources in guns. His impressions on the general condition of affairs were entirely favorable.

The production of artillery in Italy has been greatly intensified within recent months and the present equipment of light, field and heavy guns is probably as good or better now than it was before the reverse of last fall. The great industrial plants of Genoa and Milan have doubled and quadrupled their output in guns, trench mortars, rifles, machine guns, the production of mortars increasing seven fold during the year.

Similar extensive development has been going on in the production of mines and armor for naval construction and in the output of airplanes, ninety establishments being now equipped to turn out complete airplanes.

In the District Court of the United States.

For the Eastern District of Oklahoma.

In the matter of W. A. Alexander, bankrupt.

To the Honorable Ralph E. Campbell, Judge of the District Court of the United States for the Eastern District of Oklahoma:

W. A. Alexander of Ada, in the County of Pontotoc and State of Oklahoma, in said District, respectfully represents:
That on the 29th day of April, last, passed, he was duly adjudged bankrupt under the Acts of Congress relating to bankruptcy; that he has duly surrendered all his property and rights of property, and has fully complied with all the requirements of said Acts and of the orders of the court touching his bankruptcy.

WHEREFORE HE PRAYS that he may be decreed by the court to have a full discharge from all debts provable against his estate under said Bankrupt Acts, except such debts as are excepted by law from such discharge.

Dated this 4th day of June, A. D. 1918.

W. A. ALEXANDER, Bankrupt.

Endorsed;

In Case No. 1937 In Bankruptcy: In the matter of W. A. Alexander, Bankrupt—Bankrupt's Petition for Discharge.

Filed June 5, 1918. R. P. Harrison, Clerk of U. S. District Court; C. F. Green, Attorney, Ada, Oklahoma; Filed June 8, 1918; R. H. Matthews, Referee.

WHEREAS, the above and foregoing application for discharge from all debts and other claims provable under the Acts of Congress relating to Bankruptcy has been made by the above named bankrupt, and said application has been referred to the undersigned as Special Master in Chancery, now on motion of the Bankrupt's attorney.

IT IS ORDERED that all creditors of the above named bankrupt, as well as all other parties in interest, appear before the undersigned Special Master in Chancery at his office in the City of McAlester, Pittsburg County, State of Oklahoma, and in said District, at a hearing to be had on such application on the 16th day of July, A. D. 1918, at 9 o'clock A. M., or as soon thereafter as such hearing may be had, and show cause why such application should not be granted.

IN WITNESS WHEREOF, I have hereunto set my hand at the City of McAlester, in said District, on this 10th day of June, 1918.

R. H. MATTHEWS, Special Master in Chancery.

RESPECT DUE FLAG AND THE NATIONAL AIR

When "The Star Spangled Banner" is played—Citizens should rise; men should remove their hats and stand at attention.

They should remain standing until the air is finished. If walking on the street, they should stop and stand at attention. Soldiers should stand at attention and salute when the national anthem is played.

The American Flag—When the Stars and Stripes is displayed the union should be always up and to the right.

When hanging out from a building on a staff the union should be always out farthest from the building and up.

When hanging from a window or building the union should be to the right of those facing it.

The flag should never touch the ground.

When flying from the top of a building the flag should always be raised to the top of the staff. If displayed at half mast it should go to the top first and then be lowered.

When taken down even though at half mast, the flag should be raised to the top of the mast.

Soldiers should salute flag only when displayed. For that reason while on a march the flag is encased. At a band concert at one of the Oklahoma City parks recently the public walked about the grandstand and conversed when the "Star Spangled Banner" was being played. This is a violation of the ethics of the flag.

Food cooked with MAZOLA tastes better

EVEN children can eat fried potatoes, doughnuts, crullers, pastries and other good things cooked with Mazola.

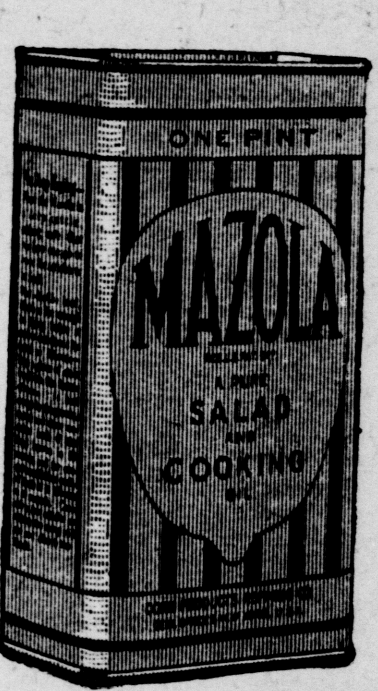

Mazola, the sweet, wholesome oil from Indian corn, is easily digested by the most delicate stomach.

It is used so much hotter than butter or lard that it never soaks into the food.

Mazola doesn't take up odors or flavors. No smell of burning fat is imparted to food cooked in Mazola. There is no waste. You can use it over and over again—even if you fry onions or fish in it.

Being an oil and not a solid fat, Mazola requires no melting. It is ready to use. Quantities can be measured exactly. It saves time—results are always satisfactory, and there is no waste.

As a salad dressing—delicate in flavor—Mazola equals the best olive oil, and is better than ordinary olive oils. It is also easier to mix. And it saves fats.

BARLEY CAKE
2 cups barley flour 4 teaspoonsful baking powder
Yolks of 2 eggs 4 tablespoonsful Kingsford's
2 tablespoonsful Mazola corn starch
1 cup water 1 cup Karo
1 teaspoonful nut meg
Beat hard to mix and then fold in the stiffly beaten whites of 2 eggs. Bake in a moderate oven for 30 minutes. This cake may be used for strawberry shortcake.

If you want to be sure of a pure, golden oil—always the same, delicate and delicious for all cooking and salad uses—see that you get Mazola. Mazola is always uniform. Its preparation is scientific and exact.

For sale in pints, quarts and gallons. (The large sizes are especially economical.) Get a can from your grocer today.

There is a valuable Cook Book for Mazola users. It shows you how to fry, bake, make dressings and sauces more delicious, make light, digestible pastry. Should be in every home. Send for it or ask your grocer. FREE.

A Call to Every American

War Savings Stamps are a call to the thrift and patriotism of every American—a call that must be met by every man, woman and child who shares the blessings of this free country, if we are to carry on this war as a united people.

What They Are

War Savings Stamps are the most democratic form of government securities ever issued—a profitable, simple and secure investment backed by the entire resources of the government and people of the United States. They steadily increase in value from the date of purchase to the date of maturity—this increase is guaranteed by the government.

These stamps are issued in denominations of \$5.00. Thrift Stamps 25 cents each.

The \$5 War Savings Stamps

The \$5 War Savings Stamp is a stamp for which the government will pay you \$5 on January 1, 1923. Its cost to you if bought in February, 1918, is \$4.13 (this cost increases one cent each month during 1918)—that is 4 per cent interest, compounded quarterly.

Simple, Secure

You don't have to figure interest, nor clip coupons, nor worry about the safety of your loan; the certificates are not transferable, and behind them are the wealth and taxing power of the richest country ever known. You can get your money back, on 10 days' notice, any time you need it.

Invest in U. S. Government War Savings Stamps

and earn 4% interest on your savings

CONSCIENTIOUS OBJECTORS GET LONG SENTENCES.

San Antonio, Texas, June 11.—Sentences of life imprisonment were imposed by a court martial today upon forty-five conscientious objectors who had refused to wear army uniforms. The sentence was reduced to twenty-five years each by Brig. Gen. J. P. O'Neil, who reviewed the records. The men were from General O'Neil's division, which is comprised of Oklahoma draft troops.

Brigadier General O'Neil designated Fort Leavenworth, Kans., prison as the place of confinement. They will be sent immediately to prison.

PUBLIC NOTICE.

All property owners residing in both the old and new sewer districts in the City of Ada are hereby notified to make connection with the sewer system and thereby get rid of the open offensive outcrops on your premises. This is not only required by the ordinances of the City, but is, also, a requirement under the regulations of the State Board of Health. It is the plain duty of the undersigned to enforce these health regulations and to that end this notice is given.

Those who fail, neglect or refuse to heed the above notice will be dealt with according to law.

Respectfully,
W. E. CONGER,
Mayor and Commissioner of Public Justice and Safety of the City of Ada.

REPORT OF EXECUTIVE COUNCIL A. F. OF L.

(By the Associated Press)
St. Paul, June 10.—"Autocracy, militarism, and its most dangerous supporting weapon, irresponsible diplomacy, must perish; democracy, justice, freedom, and absolute confidence between governments and people must be established and triumph," is the verdict of American labor upon its country's participation in the war, expressed today by the report of President Samuel Gompers and the executive council of the American Federation of Labor to the annual convention in session here.

"Workers in war production are practically a part of the fighting force," the report declares. "No action should be taken in the shops or on the field not in harmony with the purposes of the war. No strike should be inaugurated which cannot be justified to the man risking his life on the firing line in France."

"A crisis in world affairs has been reached. The battle lines of our allies in France are menaced by the forces that represent autocratic government. Each day and hour of the coming months will hold in fateful balance the destiny of the governments and the peoples representing the ideals which bring into being and maintain governments directed by the people themselves."

"America was drawn into this world war by the challenge of those autocratic forces which enthrone might as their chief aim. With the growth of achievements of our republic, this nation has stood as a beacon light to all the oppressed peoples of the earth. Our institutions have radiated to the remotest parts of the globe, concepts of a government guided and maintained by the will of its people. As a people imbued with the highest ideals of justice the fact that the allied armies have their backs to the wall fighting the minions of autocracy makes the present moment assume a ragged and a dangerous front and moves us to the solemn duty of self-examination, to determine whether we are doing our full part."

With equal emphasis, insisting that just labor policies govern war production, the report declared: "Those contributing to production should have a part in its control."

"Every worker has a right to be freed from all avoidable uncertainties of employment, both from the arising through poor labor administration and from mismanagement in production and the efforts of speculation in raw materials or finished products."

"In looking toward the future, we feel keenly that the nature of social development will depend largely upon the principles which workers shall demand as the basis for relationships."

"We are each day building labor's house of tomorrow. If that structure is to endure the test it must be founded upon the bed rock principles of equality and democracy in relations between men."

"The present war is an extraordinary opportunity to determine those principles. This life and death struggle between the nations of the world is a laboratory which is disclosing the strength or weakness of every social relationship and institution. War is forcing us back to the essentials of life. War is a fundamentally co-operative action of organic society. The present war is on such a gigantic scale that every part of national life is involved. The whole nation is in the war. The spirit of war activity and organization is essentially social. The national organism is at stake. As a war necessity we are seeking the principles which will assure the most efficient co-operation. This co-operation must come from the two primary forces of society—the possessors of creative labor power and the possessors of capital."

In behalf of labor, offering this co-operation, the report renewed its declaration that labor cannot be classed as a commodity, and demanded "equal right to representation and equal voice on all agencies determining matters affecting their interests and welfare, whether in private or government employment."

"Progress made towards this end through the shipping board and ordinance departments of the army," the report says, "indicates what must become an accepted custom in all productions." In some governmental aspects of war production, the report asserted the representation has not been accorded. It suggests that all producing enterprises be equipped with a "Labor Manager" as well as a chief engineer and other executives, and said that "there ought to be in charge of all labor problems of production a high-powered trained labor man."

In addition to its presentation of abstract principles, much of the volume of the annual report was taken up today with recent history of the Federation's activities as they had to do with the immense conversion of national industrial establishments to war service, particularly citing the maintenance of its officials for the considerable time was devoted to the war-labor board creation, and to railroad policies. It dealt likewise at length upon the adoption of various states, West Virginia, Maryland, New

Jersey, New York, Rhode Island and North Dakota of compulsory labor laws, and expressed anxiety that the idleness banned by the laws should not include that "resulting because of differences between employers and their employees."

Anticipating the spread of the legislation, the report defines the federal position towards the policy as not hostile if "due guarantees for the protection of the rights of workers are incorporated in the war emergency measures."

"Labor turn over," the report attacked as even less desirable for the worker than for the employer, and advocated as a remedy its labor manager plan, involving, it said, "intelligent and sympathetic understanding of the needs of workers and what constitutes fair dealing." It recommended to permanent industrial establishments regular conferences between committees of employees and the management, to deal with all problems, and asserted that "it is fundamental for efficiency in production that the essentials of team work be understood and followed by all."

Discussing the question of workmen's compensation, the report noted the "development of favorable sentiment for the enactment of health insurance laws," and declared that the condition was similar to that caused by accidents in industry, and asserted that "the organized labor movement in America ought to formulate a program upon this subject."

Dealing with the subject of education, the report classed the credit for vocational educational progress as due in a part to the activities of the federation, "expressed opposition to tendencies toward the vocational education of the nation with new duties. It also advocated the extension of part-time school systems, which would finish the education of minors compelled to start early in gaining their livelihood."

Porto Rican labor troubles were given some attention, and the report, citing charges brought by Mr. Gompers against Governor Yager of the island because of the use of insular police in breaking a strike on sugar plantations, asserted that the official action "had denied the right of free assembly and discussion," and said the governor had "followed an unwise trouble-provoking policy."

The report announced also that the Executive Council, in accordance with the instructions of the last convention, had adopted a resolution recommending to affiliated unions that no individuals be admitted to union membership unless they were citizens of the United States.

Reviewing the enactment of national legislation during the year, the report among other things said that President Gompers and members of the executive board had carried out the federation's policies by opposing proposals to import Chinese labor into the United States and its territories, and cited support given to wage increases for government employees, and to woman's suffrage.

"The American labor movement faces the difficult problems of the future with an organization numerically stronger and more effectively united than ever before," the council's statement concluded. "During the past months the trades union movement has carried for itself a recognition and a value more adequate than ever previously achieved. It had stood the most difficult tests, and demonstrated that it is an indispensable part of organization for production and therefore an integral part of the organization of society."

"Because it is an agency that promotes efficiency, and is indispensable to the quickest and most effective production of war materials, it is inevitable that the coming months will bring great opportunities and increasing organization. Let us strive to take every advantage of these opportunities in order that the workers may be in a position to deal wisely with the difficult problems of the reconstruction period that will follow the war, and thus to establish permanently the higher standards of life and work."

Besides President Gompers, Daniel J. Tobin, treasurer; Frank Morrison, secretary, and the eight vice-presidents of the federation, James Duncan, James O'Connell, J. F. Valentine, John R. Alpine, M. B. Perham, Frank Duffy, William Green, W. D. Mahon, were the signers of the report.

NAVY IS OPENED TO NEW REGISTRANTS

CROP ESTIMATE FOR OKLAHOMA

UNITED STATES DEPARTMENT OF AGRICULTURE
(Bureau of Crop Estimates)
Guthrie, Okla., June 7, 1918.
(Comments by J. E. Woodworth, Field Agent, Bureau of Crop Estimates, amplifying the Bureau's Crop Report for Oklahoma as of June 1, 1918.)

Cotton.
The Bureau of Crop Estimates made public on June 4, the condition of cotton as of May 25, 1918, showing for Oklahoma a condition of 86 per cent which compares with 77 in 1917, 85 per cent in 1916, and 76 per cent in 1915. The principal feature surrounding the favorable cotton condition on May 25 was the excellent and generally uniform stand obtained up to that time. Some local and excessive rains in portions of the central and eastern sections of the state caused considerable replanting and in the central part of the state farmers had been prevented from working the crop by more or less frequent showers. The larger portion of the crop had been cultivated and up to the time of the report only a small portion of the crop had been chopped out. Surface moisture was generally ample in all sections of the state with the possible exception of the southwest. A few crops have been damaged by hail and had to be replanted. The Bureau will make public on July 2 the estimated acreage planted this spring, and growing condition of the crop as of June 25, 1918.

Winter Wheat.
The deterioration in the condition of the winter wheat crop is due to the dry weather conditions in the western third of the state. Perhaps the extreme northwestern and southwestern sections have suffered most. Reports of correspondents indicate a deterioration of 22, 12 and 25 points respectively in the northwestern, western and southwestern districts. Rainfall during the latter part of May in the central and northern sections materially improved conditions such that the grain will be better matured and a high quality is promised. The crop shows improvement in the northeastern portion of the state also. The crop is all headed out, some earlier pieces turning and harvest will be under way in some sections during the first ten days in June. The Bureau estimates the condition on June 1 to be 74 per cent which on the basis of the estimate of 2,611,000 acres remaining to be harvested, forecasts 32,300,000 bushels.

Oats.
There is a material increase in the acreage of oats sown this season as compared with last year in all sections of the State with the exception of the southwest. In this section dry weather prevailed during the early seeding period, and what oats were seeded promise one third of a crop or less. The prevailing high prices of feed do not doubt encourage the heavy seeding of oats and especially in some sections of the State where winter wheat was abandoned, oats were seeded on this western third of the State the condition of the crop is uniformly good with the possible exception of some short straw in the central section. The crop is all headed out and harvest will begin at an early date in some of the southern sections.

Barley.
There is considerable reduction in the acreage of barley, especially spring sown barley, due to the dry weather prevailing in the western sections during the early seeding period. The condition on June 1 is low for the same reason.

Hay (All)
The condition of hay is practically the same as that reported last month with the exception of western sections. The rainfall in the central and eastern sections has improved conditions sufficiently to offset the western deterioration.

Alfalfa.
From the data obtained, the aggregate acreage of alfalfa is probably not far different from that standing last year. Some crops were lost on account of dry weather last year, unfavorable seeding conditions during the fall and early spring and in other sections of the State, particularly the central portion, conditions are consequently more favorable for spring seeding and consequently the best estimates indicate the new seeding will practically offset the losses. The first cutting has been harvested in practically all sections of the State. The quality of hay is spotted and varied, due no doubt to the cool and dry spring. The late rains in the central and northern sections will materially improve the condition and quality of the second crop.

Pastures.
Pastures have improved throughout the central and eastern portions more than enough to offset the deterioration in the western third of the State caused by dry weather.

Manufacturing Diamonds.
(By the Associated Press)
London, June 10.—Real diamonds, artificially made, were exhibited in connection with the annual May lecture before the British Institute of Metals. The speaker, Sir Charles A. Parsons, who is widely known for his work in developing the turbine engine, told of experiments which showed that diamonds exist in iron. The diamonds displayed were few and small, and it was stated that they were produced at enormous cost. Only the resources of a great engineering works made the experiments possible. However, the lecturer believed that with the advance of chemical and electrical engineering, it might some day be cheaper to make diamonds than to dig them.

A method of making diamonds of commercial size and quantity was suggested by Sir Charles. His plan was to submit a large mass of iron, alloyed with other elements, to heat. After the molten metal had set, but when still at a temperature permeable to gas, it should be subjected to carbon monoxide at a pressure of about 1,000 atmospheres. Under this process, he believed, segregations forming into diamonds might take place slowly within the mass.

One source of diamonds might be attributed, he said, to prehistoric falls of meteors.

Be Regular in Your Habits

Set aside so much a day or so much a week for the purchase of Thrift or War Savings Stamps. If you do not save regularly the chances are you will never save at all. A Thrift Stamp a day means that at the end of the year you will have \$91.25 saved up, wisely invested and drawing good interest. A Thrift Stamp a week means \$13 at the end of a year. A War Savings Stamp a week means \$260 laid away in the world's best security. Think of the money you wasted last year. Save it and invest in War Savings Stamps this year.

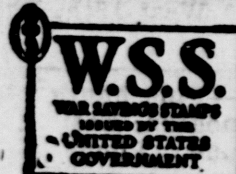

United States Government War Savings Stamps

Teach the Children Thrift

Don't hide away the baby's pennies in a toy bank. Put them to work. Invest in Thrift and War Savings Stamps, and watch the investment grow.

Baby Bonds are the best investment for the baby.

Let your children learn what it means to have money out at interest. Teach them patriotism. Make them feel that they, too, can do something for their government.

When their War Savings Stamps, bought from money they otherwise would have wasted, come due five years from now, the little folks, then grown larger, will thank their lucky stars that they had parents who taught them thrift.

RAINS BROS.

W. D. Little, secretary of the county council of defense, and Prof. J. E. Hickman are in Sulphur this afternoon to help in the organization of a council of defense in Murray county. While Murray has been doing war

work, her work has not been systematized like that in this county. The Pontotoc Council is known throughout the state as one of the best organized and most efficient in the state. In most of the moves for bet-

ter work, Pontotoc county has led and others have followed.

Miss Streeterdam gave a Vietrola demonstration for the pupils of the Normal training school today.

Invest in United States Government WAR SAVINGS STAMPS

THOSE who save, gain. Those who spend, pay the interest.

Thrift never brought such golden returns as now. The Saver profits—the Spender pays the taxes.

United States Government War Savings Stamps are government bonds in denominations of \$5.00. They yield 4% interest, compounded quarterly.

This interest is paid by taxes. Taxes are levied on the things you buy—most heavily on the luxuries. So the spender pays the interest on the money the saver banks with Uncle Sam.

Which do you choose to be?

ENTIRE FAMILY IS BENEFITED BY IT

"Tanlac is Regular Stand-by at Our House Now" says Mrs. Lankford. "Yes, Tanlac is a regular stand-by at my house now, for every member of my family of six is taking it and improving right along, while I myself have gained ten pounds on two bottles," said Mrs. Elizabeth A. Lankford, of 2811 Caroline Street, Dallas, Texas, recently.

"Ever since I had that severe attack of gripe seven years ago," continued Mrs. Lankford, "I have been in mighty bad shape. My stomach was weak and after eating anything gas would form from my undigested food and swell me up till I could hardly breathe and kept me in misery nearly all day. I fell off in weight and strength, was badly constipated and my kidneys worried me a whole lot. My nerves were in such a wretched state that I could hardly sleep at night and I thought at times I would just cough myself to death. My feet would swell and ache from my standing long at a time and whenever I stooped over my back hurt like it would break in two.

"Hearing so much about Tanlac I decided to get a bottle and I began to improve right from the start. My appetite grew till I can now eat and digest anything I want, my kidneys don't bother me any more, my constipation has been relieved and that cough nearly gone. I sleep like a child and get up in the mornings feeling fresh as a daisy and I am well and strong enough to look after the welfare of my big family of Tanlac boosters."

Tanlac is sold in Ada by Gwin & Mays Drug Company, and by leading druggists and dealers everywhere.

A COMMUNITY BUILDING COURSE

All the Normal Schools of Oklahoma are giving this summer a Community Building Course through the courtesy of the Extension Department of the A. & M. College. Some fourteen different specialists are giving lectures in connection with the course. During the first week the subject of poultry was discussed for six days by Mr. R. C. Blake, Extension Poultry Husbandman. This week Dr. D. B. Tucker, Special Agent in Rural Sanitation, discussed the "Relation of Diseases of the Army to Diseases of Civil Life," and "Rural Home and School Sanitation." Other subjects, such as "Bee Keeping," "Drying of Fruits and Vegetables," "Bread Making," Community Organizations, "Boys and Girls' Club Work," etc., will be discussed throughout the course.

The classes meet in three sections, at nine o'clock, one-thirty, and three-thirty, something like one hundred and sixty people being enrolled in the course. Inasmuch as many of the subjects will be of general interest to the citizens of Ada, President Gordon has decided to open the nine o'clock hour to anybody who cares to come and take advantage of the lectures. The class meets in room 210, the northeast corner room on the main floor. The outline for the entire course follows:

Third Week—Food Conservation
June 10.....Drying of Fruits and Vegetables
(Emergency Home Demonstration Agent)

June 11.....Drying of Fruits and Vegetables
Miss Anna Fisher
